## I was late to class today

I go to law school, I was a half hour late to my class today. However, I missed class entirely yesterday, so today's a small win. Gotta appreciate the small victories.

# Various Reddit Entries

**Depression** - I really thought about the reasons I'm still here, and this is all I can come up with. I'm quickly developing an alcohol dependency and I don't want help. I know it's conventionally wrong, but who cares? It helps me for what it's worth. There ain't nothin else. I'll never have love or the skills to do something amazing. I'm a speck.

**Bipolar** - My insurance benefits kicked in at work today. Never in my life have I had insurance. The behavioral health plan covers psychiatric care both inpatient and outpatient. Psychotherapy is also covered as is medication. I have made intake appointments with a psychiatrist and psychologist who SPECIALIZE in my diagnosis and will no longer have to deal with low income clinics and the ER. Bye bye NP and social worker. My mental health game is leveling up and I'm hoping this will help me achieve the stability I've been longing for since being diagnosed type I/potential schizoaffective last year.

**Bipolar** - I've been so anxious and frustrated lately, the start of this year has been hell. I'm trying to work through it and sometimes being destructive is the only thing that helps.
